

Pets don't age like people.

Routine diagnostics can help establish a healthy baseline in your pet. Testing can also uncover health issues, at every stage of your pet's life.¹

Feline life stages^{2*}

Medical data

Kitten

From birth up to 1 year

Expect to visit your veterinarian more often in the first year of your cat's life for vaccines and diagnostics

Young adult

From age 1 to < 7 years

1 in 5 had clinically relevant findings

Mature adult

From age 7 to < 10 years

1 in 3 had clinically relevant findings

Senior

Age 9 years and older

3 in 5 had clinically relevant findings

Canine life stages^{3*}

Medical data

Puppy

From birth up to 1 year

Expect to visit your veterinarian more often in the first year of your dog's life for vaccines and diagnostics

Young adult

From age 1 to < 4 years

1 in 7 had clinically relevant findings

Mature adult

From age 4 to < 9 years

1 in 5 had clinically relevant findings

Senior

Age 9 years and older

2 in 5 had clinically relevant findings

Talk with your veterinarian about including diagnostic testing as part of your pet's regular visit. Tests may include a complete blood count, comprehensive chemistry profile, and urinalysis.

IDEXX

*Age ranges for each life stage represent ranges assigned by IDEXX for the purpose of analyzing data from a recent IDEXX study.¹
