

Ten reasons to upgrade to Cornerstone 8.5 NEXT and IDEXX-PACS 4.2

Here are just a few of the new ways you can improve everyday work flows and deliver high-quality care:

- 1 View all your patients' IDEXX diagnostic results in seconds; we've put VetConnect® Plus right where you need it, directly on the Patient Clipboard™. You can also view pathology images, or images from the SediVue Dx® Urine Sediment Analyzer, and quickly trend patient results.
- 2 Easily update the staff ID on a tentative medical note.
- 3 Make scheduling appointments a breeze with darker grid lines and time display when hovering on open appointment times.
- 4 Save clicks in the ordering and receiving inventory windows with improved tab capability. We've also improved the Want and Purchasing Work List for faster, more accurate ordering.
- 5 With IDEXX now listed as a vendor in IDEXX SmartOrder, ordering SNAP® tests and instrument slides is fast and easy.
- 6 Spend less time resolving "Not Requested" test results.
- 7 Set a new standard for urine sediment analysis with SediVue Dx Urine Sediment Analyzer while reducing lost and incorrect charges.
- 8 Access, review and share diagnostic images faster, thanks to a next-generation database. Viewing images is easier, too—the IDEXX-PACS 4.2 Software black background helps images jump off the screen, especially in dark rooms.
- 9 Upgrade to the latest version of IDEXX-PACS™ Imaging Software as soon as it's available.
- 10 Experience IDEXX Web PACS—our next-generation, cloud-based PACS solution (available by subscription).

Read the [release notes](#) for more information on new features and improvements in Cornerstone 8.5 NEXT Software and IDEXX-PACS 4.2 Software.

Strengthen the bonds.™
